

If you're serious about climate change...

Paris

France went with nuclear power
In 10yrs they replaced almost all their coal-fired plants with nuclear power.

Emissions = 90g CO₂/kWh

Copenhagen

Denmark went with renewables
After 20yrs of extensive renewable build out, they're still struggling to replace even one coal-fired plant.

Emissions = 650g CO₂/kWh

...you're serious about zero emissions nuclear power

**Nuclear power or climate change
Take your pick**
